

DIVISION 9**FINISHES**

9.1 Building Finishes - Guidelines for building finishes are specified elsewhere. Refer to Division 1 for other references containing additional design criteria.

9.2 Finish and Concealment of Exterior Mechanical Equipment - All visible equipment, whether roof or ground mounted, must be painted alike and screened from view wherever possible. Color for such equipment, including roll-up doors, mechanical equipment, metal canopies, piping, electrical equipment, etc., and any other equipment of specialized function, shall match. Specially designed screens, suitable plant materials, and architectural enclosures can be used for screening purposes depending on the facility and location. Roof mounted equipment must be concealed behind parapet walls or in a screened enclosure of approved materials. Equipment should be grouped in clusters, preferably a single cluster to minimize the number of visible screens.
